THE BENEFITS

Why FastPatch

1. **Polymer Not Powder**
2. **Fast Return to Service**
3. **Long Lasting**

FastPatch is a unique polymer repair system that bonds tenaciously to surfaces and remains flexible throughout its service life. FastPatch is a significant leap forward in technology from antiquated cementitious or "powder" type repair materials that are non-flexible, require water, and are labor intensive to install.

The cure time of FastPatch is just a few minutes, allowing for quick return-to-service times. It is also cold-applied, which makes it safe to use and means it will not push/shove after it is installed. Overall, FastPatch will outlast and outperform traditional repair materials due to its unique polymer properties.

INCREASED PRODUCTIVITY

2x More Repairs Per Shift Than Powder

LONG-LASTING STRENGTH

10x Stronger Than Powders

FastPatch

What is *FastPatch*®?

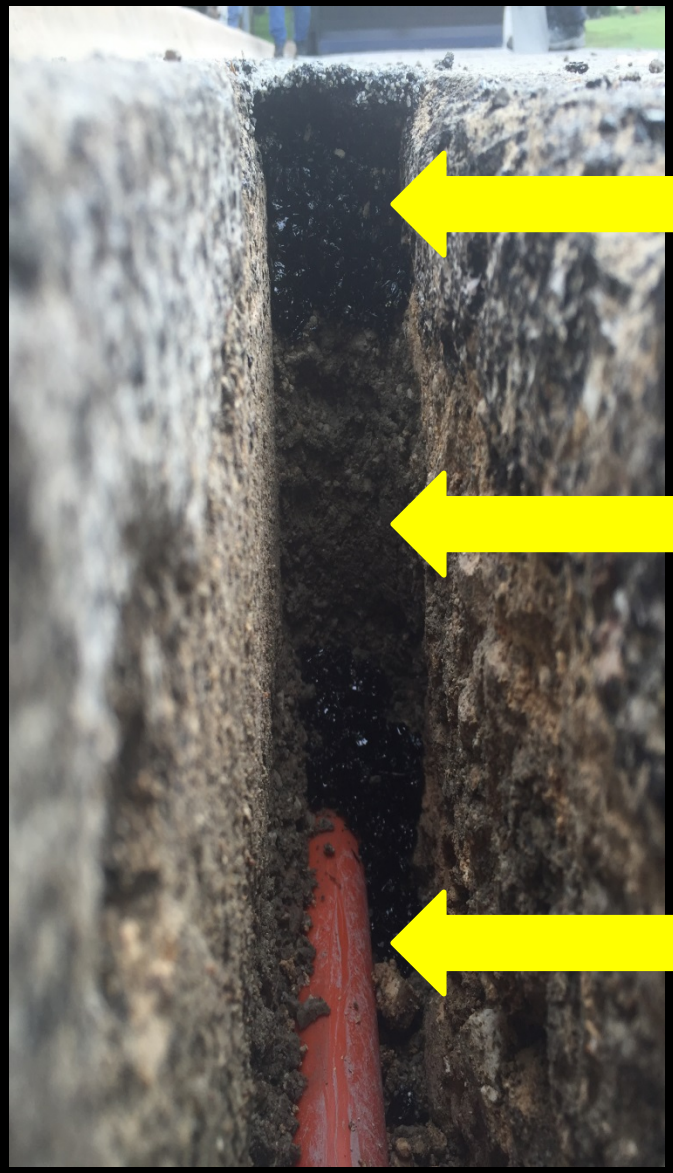
- Repair system for Asphalt & Concrete
- Bio-Based Polymer
- Cold-Applied
- Long Lasting Performance
- Contains Recycled Materials
- Non-Dangerous Product
  - No Heating
  - No Odor
  - No Solvents

FastPatch

Who uses *FastPatch*®?

FastPatch

Fiber-To-The-Home (FTTH)
Micro-Trench Reinstatement



FastPatch

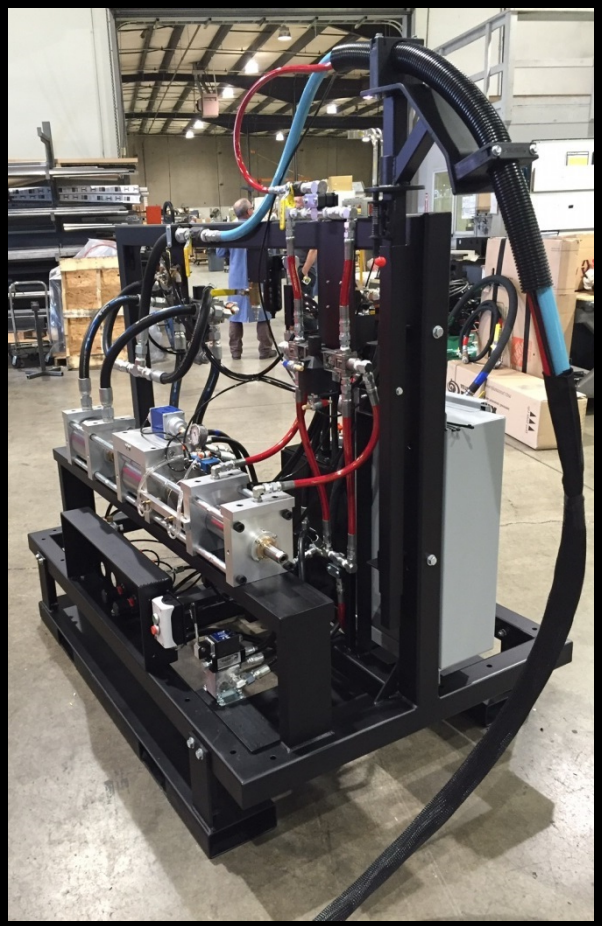
Grout

Fiber Optics

FastPatch®: FTTH Systems

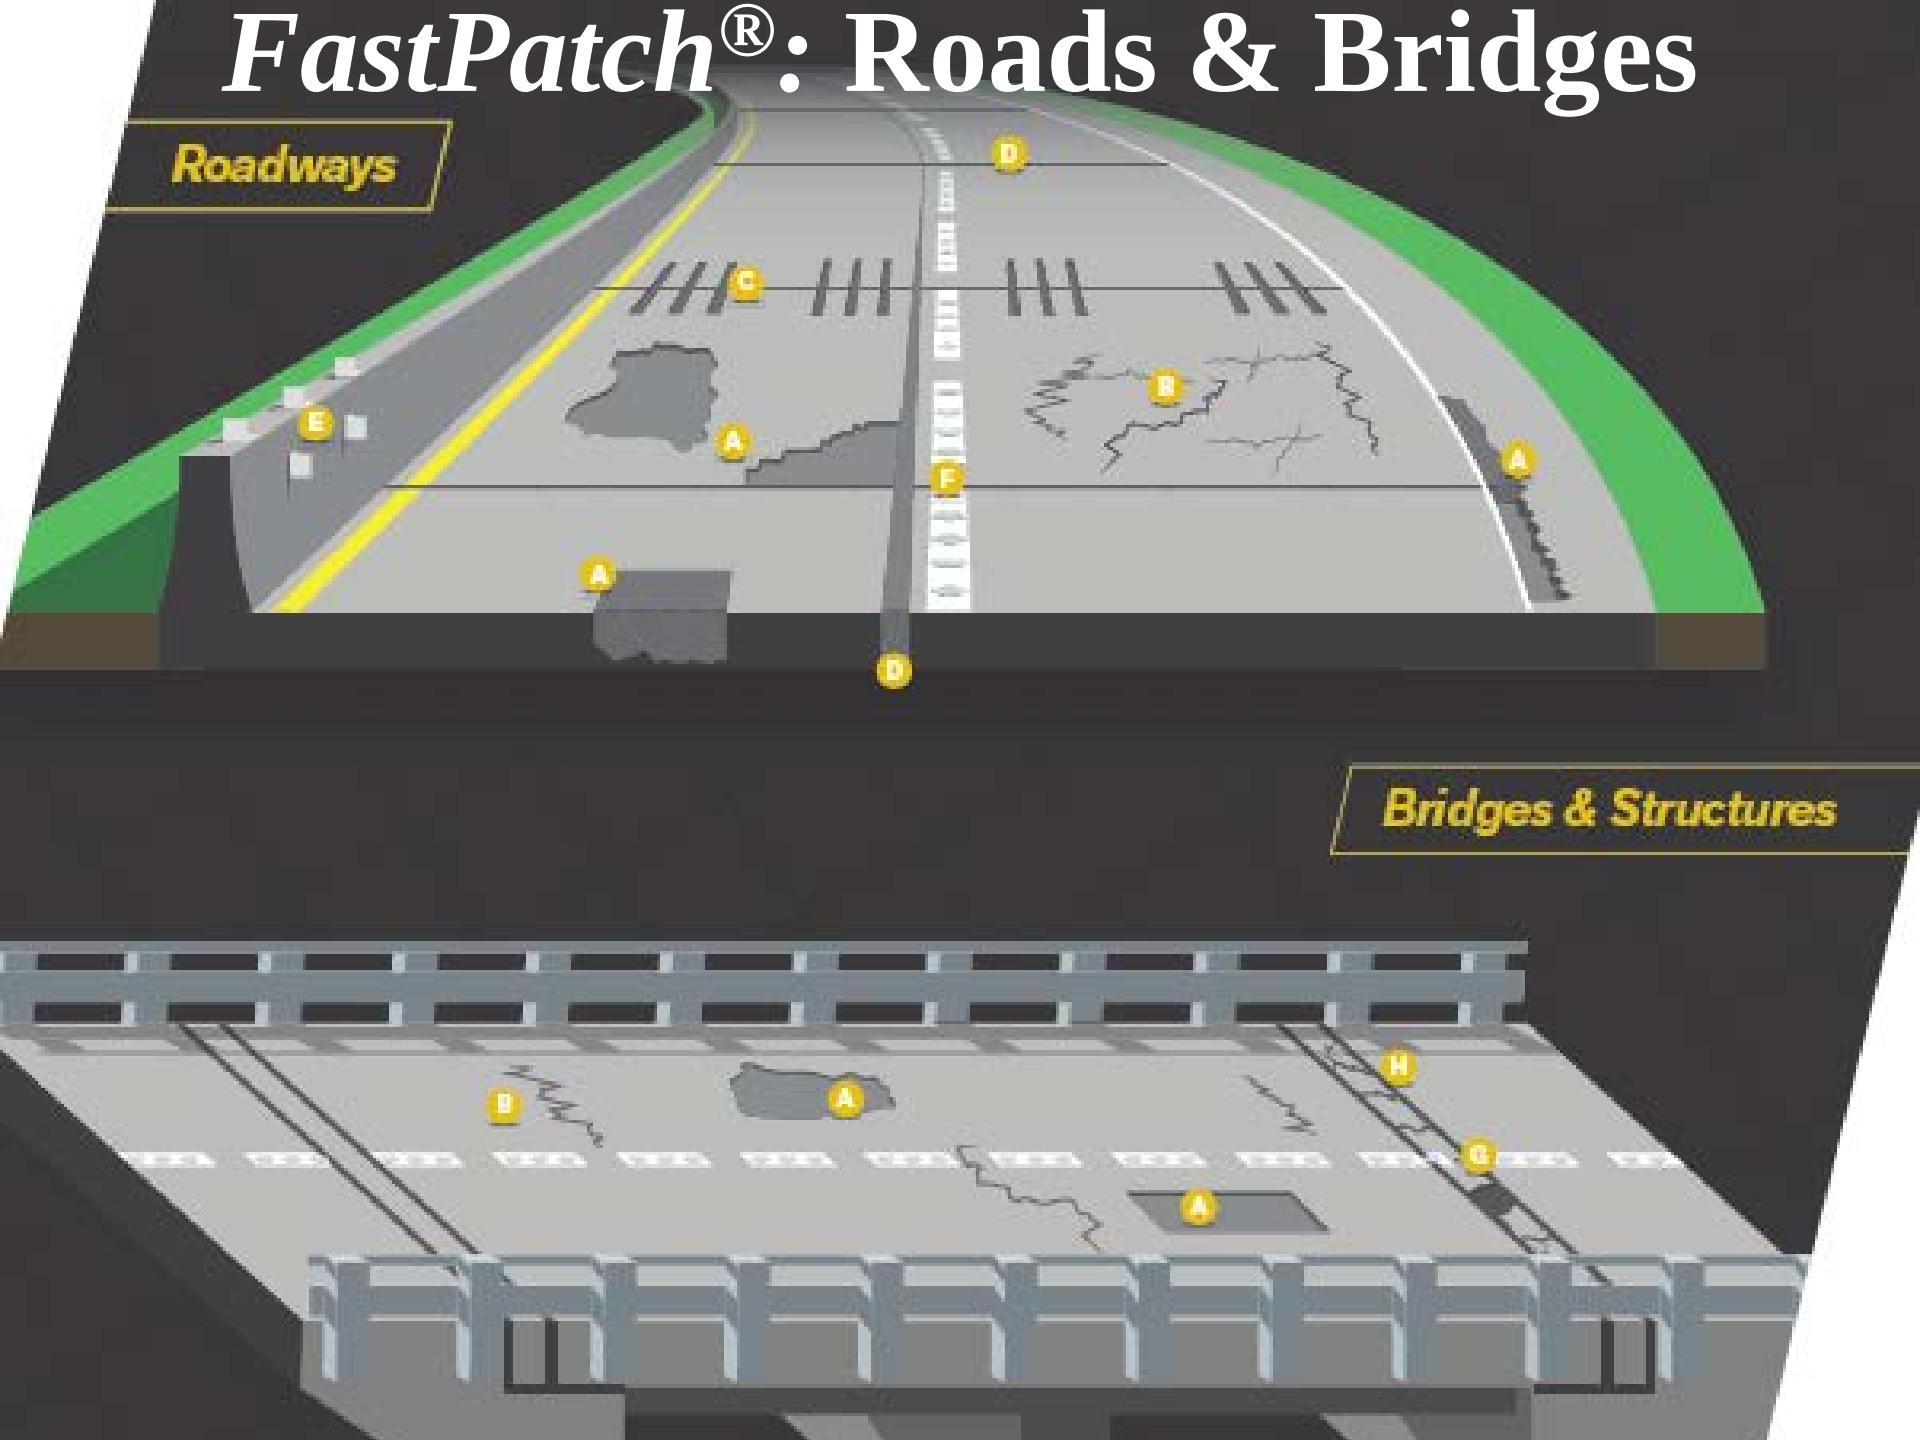
- One Worker operation
- Continuous operation per shift
- 10 minute Start-Up and Shut-Down
- Products:
  - Sidewalks: FastPatch EJC-50
  - Micro-trench: FastPatch 8400
- Dispensed directly into trench
- Slope grade tolerant

FastPatch®: FTTH Equipment



Tote → Meter → Trench-Dispenser

FastPatch®: Roads & Bridges



FastPatch®: Roads & Bridges

FastPatch®: Airports

FastPatch®: Rail Crossings (ADA Compliance & Safety)
